

OC- 4V Oxygen Concentrator

The OC-4V Oxygen Concentrator (OC) is designed specifically for Veterinary Medicine. ON₂ is now able to offer a compact OC that is completely self-contained and mobile. The OC-4V produces up to 20 LPM of 95% oxygen (+/-1%) at a delivery pressure of 50psi. ON₂ Oxygen Concentrators have been proven to offer unmatched reliability and operating efficiency for over 25 years. The OC-4V is able to provide an immediate reduction in oxygen costs and eliminate exposure to future increases due to supplier price hikes or increased usage. This OC-4V has the same reliability of our full-size systems in a fraction of the size, making it the perfect SOLUTION for any Veterinary practice.

The ON₂ Advantage

- ✓ Never Run Out of Oxygen Again!
- ✓ Eliminate the cost of transportation, storage and cylinder rentals
- ✓ Dependable 24/7 operation
- ✓ Built to Last: with brass fittings and valves
- ✓ Completely Self-Contained
- ✓ Plug and Play Operation
- ✓ Automatically starts and stops, based on O₂ usage and demand
- ✓ Compact and mobile to fit in any facility layout
- ✓ CRN registration of pressure vessels and fittings

COST ANALYSIS

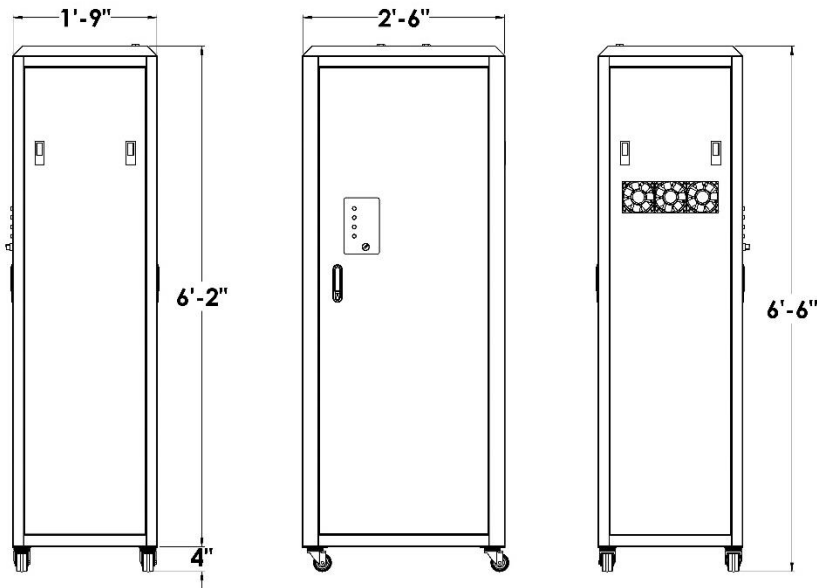

- RETURN ON INVESTMENT (ROI) – 6-10 MONTHS
- ELECTRICAL EXPENSES – LESS THAN \$.50/DAY
 - based on 8 hours of non-stop operation/day
- LEASING OPTIONS AVAILABLE
- THE DESIGN LIFE OF THE OC-4V IS EQUIVALENT TO 6500 CYLINDERS OF OXYGEN

EASY MOBILITY or STATIONARY SETUP

The OC-4V has the flexibility of mobility between rooms or connect to the existing facility piping in a permanent location. Once the system is situated in the facility, all four wheels can be locked into place. The four leveling legs provide additional stability for stationary placement.

PROVIDING A SOLUTION TO YOUR OXYGEN NEEDS FOR OVER 25 YEARS

Standard Package

- OC-4V Oxygen Concentrator
 - Sound Level - 60dB
 - Flow capacity - 20 LPM
 - Concentration - 95% oxygen (+/- 1%)
 - O₂ Storage Tank - 30 gallons at 90psi
- Operating Temp - +10 / +40C
- Power Requirement - 15A / 115V
- Automatic start/stop as per facility demand
- Alarm Indicators – Service Alarm, Alarm Reset

DUPLEX RELIABILITY & FAILSAFE OPERATION

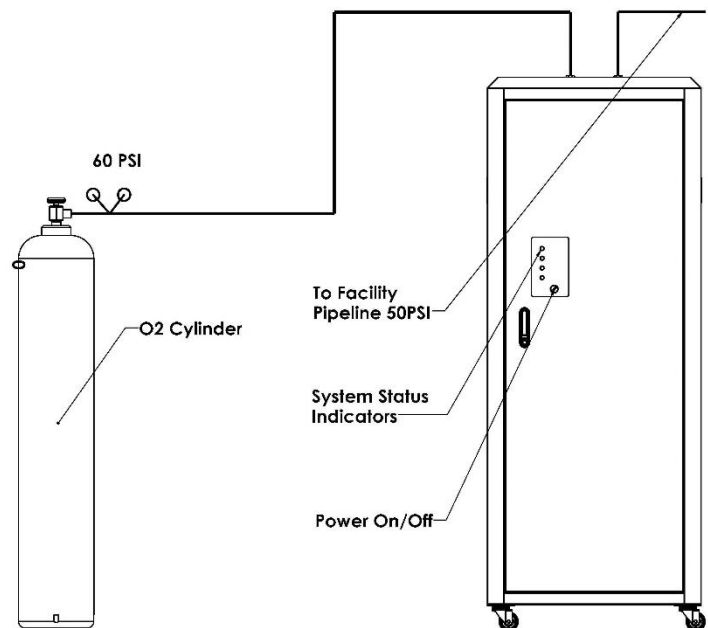

This Duplex system has two solenoid valves that can completely isolate one OC while allowing the system to continue to operate at a reduced output. The dual flow meters also allow individual output control and isolation of each of the two oxygen concentrators.

Cylinder Backup

A backup cylinder can be added to the OC-4V system to ensure adequate oxygen availability during extended power outages and/or periods of abnormal demand.

The OC-4V comes equipped with a DISS connector to attach the backup cylinder to. Once a Backup cylinder is connected to the system it will automatically provide oxygen in the case of an emergency or power outage.
